CAREER OBJECTIVE

Motivated B.Tech CSE student seeking a Research-Based Full-Stack Developer Internship. Proficient in modern frontend technologies (React, HTML/CSS, JS) and backend development (Node.js, Express, MongoDB) with a strong foundation in building RESTful APIs. Eager to leverage my web application skills and AI Foundation knowledge to contribute to innovative end-to-end R&D product development at VLSI Technology.

CORE COMPETENCIES

Frontend Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI Design
Backend & Databases: Node.js, Express.js, C++, MongoDB, RESTful APIs, JSON Serialization
Tools & Workflow: Git, GitHub, VS Code, Postman (API Testing), CI/CD concepts
Core Concepts: Data Structures & Algorithms, OOP, Authentication (JWT), Session Management, DBMS, OS

TECHNICAL PROJECTS

- CityCare - Civic Issue Reporting Platform** Oct 2025
MERN Stack (MongoDB, Express.js, React.js, Node.js) *College Hackathon - 2nd Position*
 - Built a full-stack civic issue reporting platform to bridge the gap between citizens and authorities with real-time tracking.
 - Developed responsive and interactive user interfaces using React.js and managed state for seamless user experience.
 - Engineered robust backend logic using Node.js and designed scalable RESTful APIs with JSON data serialization.
 - Implemented secure session management using JWT and OTP authentication, applying input validation for application security.
 - Conducted comprehensive API testing and debugging using Postman to ensure application reliability prior to deployment.
- GameShipperz - E-commerce Platform** Aug 2025
HTML, CSS, JavaScript, Node.js, Express, MongoDB *IBM Full Stack Training Project*
 - Developed a comprehensive gaming e-commerce platform supporting product browsing, filtering, and dynamic content management.
 - Engineered secure authentication workflows using bcrypt for password hashing and JWT for stateful session management.
 - Resolved complex backend integration challenges by designing clean API endpoints for data exchange between the frontend and MongoDB database.
 - Collaborated effectively within a team environment using Git version control for collaborative development workflows.
- MeNotes Backend Architecture** Sep 2025
Node.js, Express, MongoDB *Mini Project*
 - Architected a scalable note management backend system allowing users to organize academic tasks with precise timestamping.
 - Designed and managed a NoSQL database schema (MongoDB) optimized for efficient data retrieval and query performance.
 - Created technical documentation for API request/response handling to facilitate future frontend integration.

EDUCATIONAL QUALIFICATIONS

- Rayat Bahra Professional University** Hoshiarpur, Punjab
B.Tech in Computer Science & Engineering; CGPA: 7.64/10 Aug 2023 – Present
- Doaba Public School (CBSE)** Dohlon, Punjab
Class XII; Percentage: 88.8% 2022

CERTIFICATIONS & ACHIEVEMENTS

- Certifications:** Front End Technologies (IBM), OCI AI Foundations (Oracle - highly relevant to AI-embedded logic), SQL Basics (HackerRank).
- Hackathon Winner:** Secured 2nd position in the 3-Day Full Stack Hackathon at RBPU Hoshiarpur.
- Extracurriculars:** Student Volunteer, Synergy Functions Event, Assisted in front-desk operations, attendee management, and admission-related data collection.
